

NETGEAR Enterprise access points for SMEs

Seamless coverage for every corner
of your business

WiFi keeps today's businesses running. It connects employees, customers, devices, and business-critical applications while supporting everything from video calls to cloud services.

Choosing the right access point means finding the right balance of coverage, performance, and simplicity. NETGEAR Enterprise offers a complete portfolio of WiFi 6, WiFi 6E, and WiFi 7 access points designed for small and medium-sized enterprises. Whether you're expanding your network, supporting more connected devices, or preparing for what's next, NETGEAR delivers enterprise-class wireless without unnecessary complexity.

WiFi that earns its keep

Great WiFi isn't measured by speed alone. It's the network that delivers reliable coverage, consistent performance, and the security your business needs without creating more work for your team.

Choose an access point that's built for the way you work, and you'll spend less time managing your network and more time running your business.

With NETGEAR Enterprise access points, you can:

- Keep teams productive with reliable wireless access
- Create better experiences for customers and guests
- Connect more devices with confidence
- Extend secure coverage across your workspace
- Simplify management with NETGEAR Insight
- Scale as your business grows

When WiFi simply works, everyone can focus on the work that matters.

Right-sized wireless starts here

Every business has different wireless needs.

Whether you're covering a small office, supporting hundreds of users, or connecting multiple locations, NETGEAR Enterprise has an access point designed for your environment.

Choose the access point that fits your business

WiFi 6 access points: Everyday WiFi done right

Give employees and customers fast, dependable wireless connectivity with an affordable solution designed for everyday business applications.

Ideal for:

- Small and medium-sized offices
- Retail
- Hospitality
- Professional services
- Branch offices

Key benefits:

- Fast, reliable WiFi for business-critical applications
- Strong coverage for everyday workspaces
- PoE support for simplified deployment
- Business-grade security
- Cloud management with NETGEAR Insight

WiFi 6E access points: Built for busier businesses

Expand into the 6 GHz band to reduce congestion, improve responsiveness, and deliver a better wireless experience for more users and devices.

Ideal for:

- Growing businesses
- Education
- Healthcare
- Hospitality
- High-density offices

Key benefits:

- Access to the dedicated 6 GHz spectrum
- More capacity for connected devices
- Lower latency for video conferencing and collaboration
- Reduced wireless interference
- Centralized cloud management with NETGEAR Insight

WiFi 7 access points: Engineered for the future

Prepare your network for the next generation of wireless with exceptional speed, greater efficiency, and the capacity to support tomorrow's applications.

Ideal for:

- High-performance offices
- Multi-site organizations
- AI-enabled workplaces
- Large campuses
- Businesses planning for future growth

Key benefits:

- Ultra-fast multi-gig wireless performance
- Higher capacity for dense environments
- Lower latency for real-time applications
- Multi-Gig Ethernet support
- Future-ready investment for emerging technologies

The network behind every connection

Business WiFi powers much more than employee laptops. It keeps customers connected, supports collaboration, connects mobile and IoT devices, enables digital signage and security systems, and keeps cloud applications running across your business.

One wireless network. Every connection that matters.

A smarter way to manage your network

Compatible access points are managed through NETGEAR Insight, giving you complete visibility across every location from a single cloud dashboard. Deploy new access points remotely, monitor network health, troubleshoot issues, and manage multiple sites without setting foot on location.

With proactive alerts and AI-powered monitoring, NETGEAR Insight helps identify potential issues before they affect users. Whether you're managing one office or one hundred, you stay in control wherever business takes you.

The NETGEAR Enterprise advantage

Built to meet today's needs and tomorrow's growth, the NETGEAR Enterprise portfolio gives you everything you need for business WiFi, all in one portfolio. Features include:

- WiFi 6, WiFi 6E, and WiFi 7 access points
- Indoor and outdoor models
- Cloud management with NETGEAR Insight
- AI-powered monitoring and troubleshooting
- Secure guest networking
- Seamless roaming
- Flexible power over Ethernet options
- Business-grade security
- Easy deployment and expansion
- No per-feature licensing fees

Connect with confidence

Reliable WiFi shouldn't require a networking expert.

Whether you're supporting hybrid work, connecting more devices, opening new locations, or preparing for WiFi 7, NETGEAR Enterprise access points deliver the performance, visibility, and simplicity growing businesses need today, with the flexibility to grow tomorrow.
